1. Introduction

To run certain versions of NeuroCheck software on Windows 10, it is important to check compatibility of device drivers. This document will help you in doing so.

Furthermore we recommend that customers make themselves familiar with Microsoft Windows 10 and its applicability to industrial systems. In contrast to Windows 7, Windows 10 has some unfavorable characteristics, for example with regard to the Microsoft licensing model (Windows as a Service) or Windows Update policy (hints: Windows Update for Business, Long Term Servicing Channel).

2. Compatibility of NeuroCheck software versions
